ABSTRACTED-PUB-NO: KR2002036523A

BASIC-ABSTRACT:

NOVELTY - A system and a method for offering music copyright  
information are  
provided to easily manage members by constructing unified music  
copyright  
information, to make a user easily search the music copyright  
information, and  
to increase the transparency in the distribution of royalties by  
totaling the  
actual results of works.

DETAILED DESCRIPTION - The system comprises a router(400) to optimize  
the  
information transmitting route by receiving information request data  
from a  
copyright holder/publishing company computer(100) and a client

computer(200)  
through the Internet(300), a web server(500) to display a web page  
including  
desired information on the web browsers of the publishing company  
computer or  
the client computer, a music copyright processing server(600) to  
respond to the  
information requests related with music copyright, a database  
server(700) to  
store detailed information related with music copyright, and a  
manager  
computer(800) to manage the information request data. The music  
copyright  
processing server includes a music copyright holder registration  
module(610), a  
client registration module(620), a work management/search  
module(630), a  
contract/actual result registration module(640), and a royalty  
distribution  
module(650).
